The report highlights their business models, production processes, organizational structures, and marketing strategies. It also focuses on entrepreneurial insights such as challenges, innovations, and growth strategies. The study helps in understanding real-world business operations and the importance of entrepreneurship in the garment sector.

INTRODUCTION

The apparel manufacturing industry plays a vital role in India's economy by generating employment and contributing to exports. It involves the production of garments such as uniforms, casual wear, and customized clothing.
With changing customer preferences, the industry has shifted towards customization and fast production. Modern companies focus on digital printing and online marketing, while traditional units emphasize bulk production. This report helps in understanding both modern and traditional approaches in the apparel industry.
